

MOHAMMAD IBRAHIM

FULL STACK DEVELOPER

Jordan | Age: 23 | Phone: 0789788274 | Email: Mohamadhaytha2003@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack Web Developer with experience across frontend, backend, databases, and API development. Skilled in building structured, maintainable web applications using multiple programming languages and frameworks. Strong problem-solving mindset with an interest in software engineering, architecture, and continuous learning.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Java, C#

Web Development: HTML5, CSS3, Responsive Web Design, Bootstrap

Backend & Frameworks: Laravel, ASP.NET Core MVC, REST APIs, Entity Framework

Databases: MySQL, Relational Database Design

Software Engineering: Object-Oriented Programming (OOP), MVC Architecture, Repository Pattern, API Integration, Software Architecture, Problem Solving

Tools & Development: Git, GitHub, Figma

PROFESSIONAL EXPERIENCE

Full-Stack Web Development PHP-Laraver Trainee Bootcamb

Orange Jordan Academy — Jordan | September 2026 – Present

- Develop web applications across frontend and backend components using modern web development technologies.
- Build responsive user interfaces and implement backend functionality, APIs, and database integration.
- Apply software development concepts including MVC architecture, OOP, problem solving, and structured application design.
- Work on practical development tasks and projects while improving coding, collaboration, and software engineering skills.

ASP.NET Core MVC — Step by Step Training

Step-by-Step Academy | Jordan

- Developed a structured web application using ASP.NET Core MVC.
- Worked with Entity Framework and relational databases.
- Applied MVC architecture and Repository Pattern.
- Implemented CRUD operations, data management, and backend functionality.
- Built an administrative interface and integrated application components.

SELECTED PROJECTS

ASP.NET Core MVC Administration System | Academic / Personal Project | Jordan | 2025 - 2026

- Built a database-driven MVC application using C#, ASP.NET Core MVC, Entity Framework Core, and repository-based architecture.
- Implemented administrative workflows, data operations, validation, and structured separation of application responsibilities.

Web Application / University Project | Hashemite University | Jordan | 2025 - 2026

- Developed a multi-page web application as part of university work, focusing on practical frontend implementation, application structure, and maintainable code.
- Planned backend expansion using PHP/Laravel and worked toward connecting application functionality with persistent data and server-side logic.

EDUCATION

Bachelor of Science in Computer Science | The Hashemite University | Zarqa, Jordan | 2025

- Academic focus: programming, object-oriented design, databases, web development, software engineering, and problem solving.

ADDITIONAL INFORMATION

- Languages: Arabic (Native), English (Good/ actively improving)
- Career focus: Full Stack PHP/Laravel development, backend engineering, REST API development, and database-driven web applications.
- Professional interests: Java/Spring Boot, software architecture, data mining, developer tooling, and building scalable web products.
